

# Cut-End Mops

The most common type of mop in use today is the cut-end style. In addition to its lower initial cost, a number of other factors contribute to its popularity. They are available in a broad variety of sizes, yarn types, plies, and optional features which add to its versatility and usefulness. From the headband sewn in the middle, the yarn strands hang freely and are evenly trimmed. Narrow band models should be used with stirrup style mop handles. Use gripper style mop handles on wide head band models.

Cotton is the most popular mop yarn in the industry. Its great absorbency and moisture-holding ability makes cotton mops the perfect choice for wet pick-up when getting the floor dry is important. Naturally resistant to harsh chemicals, high temperatures and abrasion, it excels in general maintenance, stripping, scrubbing and rinsing applications. A broad selection of yarn sizes and quality is available. All cotton mops require break-in at initial use.

Rayon fibers in the cut-end blends enhance the effectiveness of water pick-up and enables the mop to go to work immediately without the "break-in" period. Cotton fibers aid in water retention, abrasion and chemical resistance and provides floor-drying capability. Polyester and acrylic fibers improve tensile strength and wearability while helping to retard shrinkage.

- Standard headbands for cut-end mops are 1 1/4" white woven tape or 5" nylon mesh.
- 4" and 6" headbands also available.
- Scrubbing pad on wide mesh headbands available.
- 4 or 6 pack carton optional.

See page 8 for additional wet mop options.

# Cotton & Cotton Blends

## Mega

Mega is Paragon's most economical mop. The spinning process results in a blended cotton yarn with a clean, white appearance and minimal pepper trash. It is an ideal choice for general mopping conditions where economy and disposability are factors to be considered. Available in 4-ply only.

4-ply	Narrow Band	Wide Band
12 oz	101112	105112
16 oz	101116	105116
20 oz	101120	105120
24 oz	101124	105124
32 oz	101132	105132

## Classic

Classic is a superior quality mop designed for heavy duty, continuous mopping activity where a long lasting, cost efficient product is needed. A yarn twist of more than 7 turns per inch contributes to its great strength and durability. Yarn size is medium and is available in 4-ply and 8-ply.

# Cut-End Blends

## Cal-Pro

The finest all-purpose cotton mop available in the industry. In addition to doing all the jobs normally performed with cotton mops, Cal-Pro is also an excellent floor finish mop. Made of super thin strands of yarn with a twist of 12 turns per inch, it is soft and absorbent with a very low-lint factor. Available in 8-ply yarn only.

8-ply	Narrow Band	Wide Band

## Bristol Rayon/Synthetic Blend

Rayon yarn spun from high quality, long staple, virgin fibers with polyester added to create a blend with superior wet strength and enhanced low-lint characteristics. With a high absorbency rate and smooth release, Bristol is very popular for use in applying floor finish, disinfectants and germicides. Available in 4-ply and 8-ply bright white yarns and 4-ply colors of blue and green.

## Royal Rayon/Synthetic Blend

A premium rayon blend similar to Bristol, but constructed of yarn strands that are thinner and more tightly twisted resulting in a very durable, longer lasting mop. With 40% more strands at work, floor finishes and chemicals can be applied evenly with less streaking. Available in 4-ply and 8-ply bright white yarns.

## Rayco

### Cotton/Rayon/Synthetic Blend

The advantages of both cotton and rayon are realized in our Rayco blend. The addition of polyester and acrylic fibers increases its tensile strength, absorbency and moisture retention capability. Rayco absorbs more than 6 times its dry weight and requires no break-in. Available in blue, green, orange, red and natural white 4-ply yarns.

## Mirage - Cotton/Synthetic Blend

Mirage yarns are made by blending cotton and synthetic fibers in a unique manufacturing process where colored fibers are applied to the surface area of the yarn resulting in an aesthetically pleasing appearance. Mirage is an excellent choice for most general mopping applications. It is not recommended for rough surfaces. Available in the most popular colors of blue and green 4-ply yarns.

# Mop Options

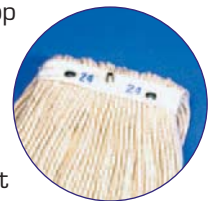

## E-Z Stik

Designed to make mop loading and unloading quick and easy without touching the dirty mop. A screw connector through the headband attaches to a screw-on style handle. A metal band securely locks the yarn in place.

## ScuffGuard

An E-Z Stik style mop without the exterior metal band. Its soft shoulders help to prevent scuffing or marring of floors, furniture, equipment and baseboards.

## Twist-Lok

A revolutionary product that is designed to be used with an economical threaded handle. Featuring a durable, non-corrosive molded plastic head, Twist-Lok is available on any of our 4-ply or 8-ply cut-end, Standard loop or Roto-loop style mops.

## Fanspred

This feature improves the performance of a cut-end mop. A woven tape is double-sewn near the bottom of the mop spreading the strands evenly. This option is essential if a cut-end mop is to be laundered.

- Longer mop life, saves labor
- Prevents tangling
- Holds mop strands flat and parallel
- Wider surface coverage
- Limits fraying and loose strands

The Fanspred band can be color coded along with the headband if desired. Double fanspred available.
